

PSI is a leading full-service CRO operating globally.

98% of PSI-managed clinical trials complete patient enrollment on or ahead of schedule.

PSI's exceptional repeat and referral business rate distinguishes PSI in the market place as a "no-nonsense" CRO that delivers across trials of all sizes and levels of complexity.

**PSI has successfully performed Phase II/III studies in the following cardiovascular indications:**

- Acute myocardial infarction
- Angina pectoris
- Arrhythmias
- Congestive heart failure
- Coronary intervention
- Coronary artery disease
- CVD (including TIA and stroke)
- Hypertension
- Orthostatic hypotension
- Peripheral vascular disease
- Prevention of cardiovascular events
- Occluded central venous access devices

PSI employs physicians as full-time monitors and project managers, most of whom are board certified specialists, including cardiologists, paediatric cardiologists, critical care specialists, and angiologists.

**ULTRA-FAST PATIENT ENROLLMENT.  
IT'S ABOUT TIME.**
