

ENDOCRINE & METABOLIC DISEASES

PSI is a leading full-service CRO operating globally.

98% of PSI-managed clinical trials complete patient enrollment on or ahead of schedule.

PSI's exceptional repeat and referral business rate distinguishes PSI in the market place as a "no-nonsense" CRO that delivers across trials of all sizes and levels of complexity.

PSI has successfully performed Phase II/III studies in the following metabolic disease indications:

- Contraception
- Diabetes Mellitus (adult, paediatric)
 - Type I
 - Type II
- Diabetic Nephropathy
- Diabetic Neuropathy
- Diabetic Retinopathy
- Growth Retardation
- Hyperlipidemia
- Metabolic Syndrome
- Obesity
- Osteoporosis

PSI employs physicians as full-time monitors and project managers, most of whom are board certified specialists, including internists, gynecologists, and endocrinologists.

**ULTRA-FAST PATIENT ENROLLMENT.
IT'S ABOUT TIME.**
